Purpose and Scope

of

Radford's Portfolio of Plans

AMERICANS are a nation of home-builders. A man's standing in any community is based largely on the kind of house he lives in. If it is his own home, he enjoys an importance that does not attach to the man who pays rent. The instinct of home-owning is as natural as breathing. From the bird of the air which builds its nest in the spring, to man, the king of all, it finds expression in various forms.

In glancing over the building designs illustrated in this volume, one may wonder at the marvelous advances made in home architecture in recent years. It is not a difficult stretch of imagination from the makeshift habitations of the early days to the beautiful homes of comfort and luxury shown in these pages; yet it has been a development slow and sure, keeping pace with the advancement of the race along all lines.

Even a brief and hurried examination will show that the buildings illustrated embody a wide diversity of design. This is done deliberately, since taste in home architecture is as varied as in any other field. The collection includes many houses especially designed for people of moderate means, as well as other larger and more elaborate designs for the more wealthy. In all cases, however, the designs have been made with reference to convenience and economy, and no pains or expense has been spared in their preparation.

Every design shown is the work of a skilled architect of experience, who has made a special study of home architecture and is thoroughly familiar with modern requirements. During the many months that this volume has been in preparation, it has received the benefit of the most careful attention, and many designs have been rejected to make place for others that were considered better. In a word, the present collection is the best that could be secured.

The special purpose in presenting this work to the public at this time, is to make more easy the problem of house building for the dweller in rural communities, in small towns, and in cities, for there are designs here that will be found adapted to any community.

In selecting the design of a house, there are a number of factors that should be taken into consideration. The size of the lot, the possible slope of the ground, and the surrounding buildings have much to do with the appropriateness of any design. In other words, the artistic sense will direct the selection of a design that will be in harmony with the surroundings. These are things that should be considered at the outset, for the selection of the design is indeed the most important feature of the problem. Select a design that assures plenty of room for the needs of the family—present as well as future. It will not be necessary to consider the matter of convenience of interior ar-

arrangement, for the architects have solved that problem in every case. Every house is planned from the inside, and not from the outside; that is to say, convenience of arrangement has been the first consideration, and we believe this fact will be appreciated by the wives and daughters.

The location of the house is another important feature. It should not be placed in the middle of the lot. To provide lawn room and a place for shrubbery and flower beds, the house should be at one side or well back, so that when the lawn decorations are placed the picture will be artistic and the grounds contribute to the unity and harmony of the entire design. Often this point is overlooked, and an otherwise attractive house is marred in its effect by being out of harmony with the lot on which it sits.

A man who builds a home owes a duty not alone to his family and himself; he is under a moral obligation to the community as well. No man has a moral right to build a house which will be unworthy of the community in which he lives, or which, by its inappropriateness or utter lack of style, will tend to depreciate the value of property in the neighborhood. In house building, as in all other things in which men engage, the purpose should be improvement and betterment. So we advocate only a house built from accurately drawn plans—a house with style.

As the house may be the habitation of the family for life, no greater calamity in a material way can befall the owner than to discover, when the house is complete, that it is faulty in arrangement or in appearance. This is apt to be the case with a house built without plans. On the other hand, it is a source of constant joy and satisfaction to live in a house which is properly constructed from accurately drawn plans and which is worthy of the neighborhood.

Let us impress upon your mind one vital thing. NEVER build a house without plans to work from. It is hardly necessary to tell you that no more foolish thing is ever done by a man than to try to build without plans, or—which is just about as bad—from rough pencil sketches. We could show you in our files thousands of letters from persons who have ordered plans after failing miserably in their efforts to build without accurate drawings. Here are some of the things that happen to the man who tries to build without plans: His house lacks style, that peculiarly pleasing aspect that is possible only in a house built from an accurate design. He wastes materials. He wastes the time of his workmen. He wastes nervous energy in worry over mistakes; and, when the house is done, if it ever be, he has a monstrosity that people laugh at as they go along the street. This window will not be square; that floor will not be level; and—worst of all—the owner himself will be dissatisfied with the structure.

Every design in this book is drawn with a faithful regard for mathematical accuracy, and there is no error to bother the builder. It is safe to say that the saving in materials that will result from building after any of these plans, will more than pay the price asked for them. So be sure you start right—build only from accurately drawn plans.

We Illustrate in this Book the perspective view and floor plans of over 300 moderate-priced buildings.

In the preparation of this work great care has been exercised in the selection of original, practical and attractive house designs, such as seventy-five to ninety per cent of the people to-day wish to build. In drawing these plans special effort has been made to provide for the MOST ECONOMICAL CONSTRUCTION, thereby giving the home builder and contractor the benefit of the saving of many dollars; for in no case have we put any useless expense upon the building simply to carry out some pet idea. Every plan illustrated will show, by the complete working plans and specifications, that we give you designs that will work out to the best advantage and will give you the most for your money; besides every bit of space has been utilized to the best advantage.

\$100.00 Plans for only \$10.00 This department has for its foundation the best equipped architectural establishment ever maintained for the purpose of furnishing the public with complete working plans and specifications at the remarkably low price of only \$7.00 to \$15.00 per set. Every plan we illustrate has been designed by a licensed architect, who stands at the head of his profession in this particular class of work and has made a specialty of low and medium-priced houses. The price usually charged for this work is from \$75.00 to \$100.00.

What We Give You The first question you will ask is, "What do we get in these complete working plans and specifications? Of what do they consist? Are they the cheap printed plans on tissue paper without details or specifications?" We do not blame you for wishing to know what you will get for your money.

Blue Printed Working Plans The plans we send out are the regular blue printed plans, drawn one-quarter inch scale to the foot, showing all the elevations, floor plans and necessary interior details. All of our plans are printed by electricity on an electric circular blue-printing machine, and we use the very best grade of electric blue-printing paper; every line and figure showing perfect and distinct.

Foundation and Cellar Plans This sheet shows the shape and size of all the walls, piers, footings, posts, etc., and of what materials they are constructed; shows the location of all windows, doors, chimneys, ash-pits, partitions, and the like. The different wall sections are given, showing their construction and measurements from all the different points.

Floor Plans These plans show the shape and size of all rooms, halls and closets; the location and size of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

Elevations A front, right, left and rear elevation are furnished with all the plans. These drawings are complete and accurate in every respect. They show the shape, size and location of all doors, windows, porches, cornices, towers, bays, and the like; in fact, give you an exact scale picture of the house as it should be at completion. Full wall sections are given, showing the construction from foundation to roof, the height of stories between the joists, height of plates, pitch of roof, etc.

Roof Plan This plan is furnished where the roof construction is at all intricate. It shows the location of all hips, valleys, ridges, decks, etc. All the above drawings are made to scale one-quarter inch to the foot.

Details All necessary details of the interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rails, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one-half inch to the foot. These blue-prints are substantially and artistically bound in cloth and heavy water-proof paper, making a handsome and durable covering and protection for the plans.

Specifications The specifications are typewritten on Lakeside Bond Linen paper, and are bound in the same artistic manner as the plans, the same cloth and water-proof paper being used. They consist of twenty-two pages of closely typewritten matter, giving full instructions for carrying out the work. All necessary directions are given in the clearest and most explicit manner, so that there can be no possibility of a misunderstanding.

Basis of Contract The working plans and specifications we furnish can be made the basis of contract between the home builder and the contractor. This will prevent mistakes, which cost money, and they will prevent disputes which are unforeseen and never settled satisfactorily to both parties. When no plans are used the contractor is often obliged to do some work he did not figure on, and the home builder often does not get as much for his money as he expected, simply because there was no basis on which to work and upon which to base the contract.

No Misunderstanding Can Arise when a set of our plans and specifications is before the contractor and the home builder, showing the interior and exterior construction of the house as agreed upon in the contract. Many advantages may be claimed for the complete plans and specifications. They are time savers, and, therefore, money savers. Workmen will not have to wait for instructions when a set of plans is left on the job. They will prevent mistakes in cutting lumber, in placing door and window frames, and in many other places where the contractor is not on the work and the men have received only partial or indefinite instructions. They also give instructions for the working of all material to the best advantage.

Free Plans for Fire Insurance Adjustment You take every precaution to have your house covered by insurance; but do you make any provision for the adjustment of the loss, should you have a fire? There is not one man in ten thousand who will provide for this embarrassing situation. You can call to mind instances in your own locality where settlements have been delayed because the insurance companies wanted some proof which could not be furnished. They demand proof of loss before paying insurance money, and they are entitled to it. We have provided for this and have inaugurated the following plan, which cannot but meet with favor by whoever builds a house from our plans.

Immediately Upon Receipt of Information from you that your house has been destroyed by fire, either totally or partially, we will forward you, free of cost, a duplicate set of plans and specifications, and in addition we will furnish an affidavit giving the number of the design and the date when furnished, to be used for the adjustment of the insurance.

Without One Cent of Cost to You and without one particle of trouble. We keep a record of the number of the house design and the date it was furnished, so that, in time of

loss, all it will be necessary for you to do is to drop us a line and we will furnish the only reliable method of getting a speedy and satisfactory adjustment. This may be the means of saving you hundreds of dollars, besides much time and worry.

Our Liberal Prices

Many have marveled at our ability to furnish such excellent and complete working plans and specification at such low prices. We do not wonder at this, because we charge but \$7.00 to \$15.00 for a more complete set of working plans and specifications than you would receive if ordered in the ordinary manner, and when drawn especially for you, at a cost of from seventy-five to one hundred dollars. On account of our large business and unusual equipment, and owing to the fact that we divide the cost of these plans among so many, it is possible for us to sell them at these low prices. The margin of profit is very close, but it enables us to sell thousands of sets of plans, which save many times their cost to both the owner and the contractor in erecting even the smallest dwelling.

Our Guarantee

Perhaps there are many who feel that they are running some risk in ordering plans at a distance. We wish to assure our customers that there is no risk whatever. If, upon receipt of these plans, you do not find them exactly as represented, if you do not find them complete and accurate in every respect, if you do not find them as well prepared as those furnished by any architect in the country, or any that you have ever seen, we will refund your money upon the return of the plans from you in perfect condition. All of our plans are prepared by architects standing at the head of their profession, and the standard of their work is the very highest. We could not afford to make this guarantee if we were not positive that we were furnishing the best plans put out in this country, even though our price is not more than one-seventh to one-tenth of the price usually charged.

Bill of Material

We do not furnish a bill of material. We state this here particularly, as some people have an idea that a bill of material should accompany each set of plans and specifications. In the first place, our plans are gotten up in a very comprehensive manner, so that any carpenter can easily take off the bill of material without any difficulty. We realize that there are hardly two sections of the country where exactly the same kinds of materials are used, and, moreover, a bill which we might furnish would not be applicable in all sections of the country. We furnish plans and specifications for houses which are built as far north as the Hudson Bay and as far south as the Gulf of Mexico. They are built upon the Atlantic and Pacific Coasts, and you can also find them in Australia and South Africa. Each country and section of a country has its peculiarities as to sizes and qualities; therefore, it would be useless for us to make a list that would not be universal. Our houses, when completed, may look the same whether they are built in Canada or Florida, but the same materials will not be used, for the reason that the customs of the people and the climatic conditions will dictate the kind and amount of materials to be used in their construction.

Estimated Cost

It is impossible for anyone to estimate the cost of a building and have the figures hold good in all sections of the country. We do not claim to be able to do it. The estimated cost of the houses we illustrate is based on the most favorable conditions in all respects, and includes everything but the plumbing and heating. We are not familiar with your local conditions, and, should we claim to know the exact cost of a building in your locality, a child would know that our statement was false. We leave this matter in the hands of the reliable contractors, for they, and they alone, know your local conditions.

We Wish to be Frank With You

and therefore make no statement that we cannot substantiate in every respect. If a plan in this book pleases you; if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, then we make this claim—that it can be built as cheaply as if any other architect designed it, and we believe cheaper.

We Have Studied Economy

in construction, and our knowledge of all the material that goes into a house qualifies us to give you the best for your money. We give you a plan that pleases you, one that is attractive, and one where every foot of space is utilized at the least possible cost. Can any architect do more, even at seven to ten times the price we charge you for plans?

Reversing Plans

We receive many requests from our patrons for plans exactly according to the designs illustrated, with the one exception of having them reversed or placed in the opposite direction. It is impossible for us to make this change and draw new plans, except at a cost of about eight times our regular price. We see no reason why our regular plans will not answer your purpose. Your carpenter can face the house exactly as you wish it, and the plans will work out as well facing in one direction as in another. We can, however, if you wish, and so instruct us, make you a reversed blue-print and furnish it at our regular price; but in that case all the figures and letters will be reversed, and, therefore, liable to cause as much confusion as if your carpenter reversed the plan himself while constructing the house.

We Would Advise

however, in all cases where the plan is to be reversed, and there is the least doubt about the contractor not being able to work from the plans as we have them, that two sets of blue-prints be purchased, one regular and the other reversed, and in such cases we will furnish two sets of blue-prints and one set of specifications for only fifty per cent added to the regular cost, making the \$10.00 plan cost only \$15.00.

Immediate Delivery Guaranteed

Our equipment and facilities are such that we can send out the same day we receive order the complete plans and specifications for any house we illustrate. Delivery is made by express whenever possible, otherwise plans and specifications are forwarded by mail.

First Floor Plan

Second Floor Plan

Size: Width, 24 feet 6 inches; length, 44 feet, exclusive of porch.

The majority of the people build only one house in a life time, and therefore, it is the duty of every prospective builder to make his home as comfortable and attractive as possible.

This kind of a home costs no more to build than the ordinary structures usually seen in towns and villages, and the prospective builder can well afford to take a little time and investigate the latest designs.

Design No. 19

Blue prints consist of cellar and foundation plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of type-written matter.

First Floor Plan

Second Floor Plan

Size: Width, 32 feet; length, 52 feet, exclusive of porches.

The floor plans we furnish show the shape and size of all rooms, halls and closets; the locations and sizes of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

All necessary details of interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rail, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one-half inch to the foot.

Price of Plans and Specifications. \$15.00

Very attractive design for Bank Building to be constructed of brick with front of stone and brick making a very handsome and practical building suitable for any city or town. The first floor is devoted exclusively to banking purposes. In the center is placed a large fire-proof vault. Back of the vault the entrance and stairs to the basement are located. In the extreme rear provision is made for a directors' room, 14 feet by 12 feet 6 inches, and a small private office 8 feet 6 inches square with entrance to both the directors' room and the bank proper. The second floor is devoted entirely to offices, and if not required for use by bank can be rented separately or en suite. Estimated cost of construction under favorable conditions from about \$5100.00 to about \$5800.00.

Price of Plans and Specifications..... \$20.00

DESIGN NO. 4014.

See opposite page for Floor Plans of this building.

Three-story flat building of brick or reinforced concrete, each floor divided into two apartments of four and five rooms each, making six apartments in all on an average city lot of 25 feet in width and 125 feet in length. The main entrance is located in front and the entrance to the rear apartments at the side of the building. All rooms are large and well lighted, the majority of the rooms in the front apartments opening onto a hall. Large closets. Basement is full height and in addition to the necessary store rooms, there is plenty of laundry room. This style of a building will prove to be very practical and is bound to be a paying investment. The estimated cost of construction under favorable conditions is from about \$11,500.00 to about \$13,500.00.

S. H. No. 608

FIRST FLOOR PLAN

SECOND FLOOR PLAN

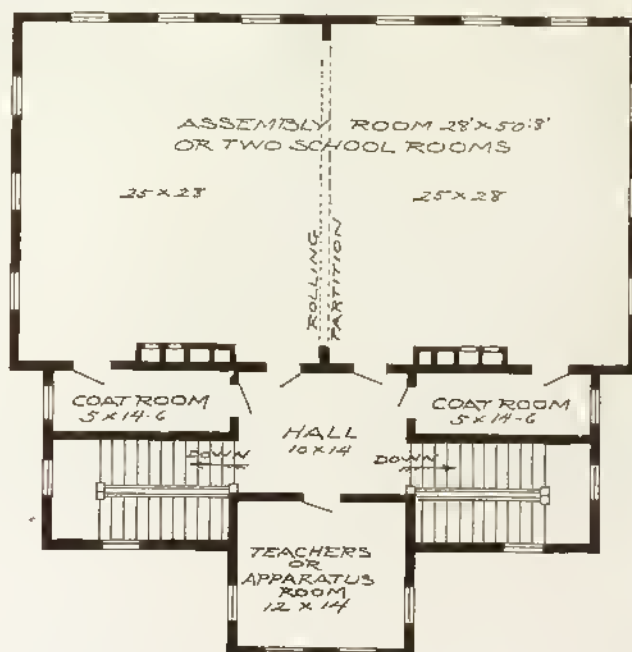

This building is of the Spanish Mission style of architecture and has been a very successful design. Brick and stone construction. Exterior dimensions are 70 ft. by 76 ft.

S. H. No. 415

FIRST FLOOR PLAN OF
A FOUR ROOM SCHOOL HOUSE

SECOND FLOOR PLAN OF
A FOUR ROOM SCHOOL HOUSE

This school is well arranged for a district or village school, where the occasional use of an assembly room or lecture room is required. The second floor school rooms can be thrown together by means of a rolling partition into one large room. There are two sets of stairways to the first floor, which has three exits.

The above picture shows the building of wood construction. This design can be changed to brick and stone if so desired.

A ONE ROOM SCHOOL HOUSE

DESIGN 100
FRAME 37' x 45'

G. W. ASHBY, ARCHT.

S. H. No. 100

This design illustrates a one room district school house. The main room would comfortably seat about fifty pupils. There are two wardrobes, which will prevent confusion, one for boys and the other for girls. It is of frame construction with a brick or stone foundation. Exterior dimensions are 37 ft. by 45 ft.

FRONT ELEVATION

SIDE ELEVATION.

DESIGN FOR A SMALL BARN WITH FOUR STALLS

FIRST FLOOR PLAN

SECOND FLOOR

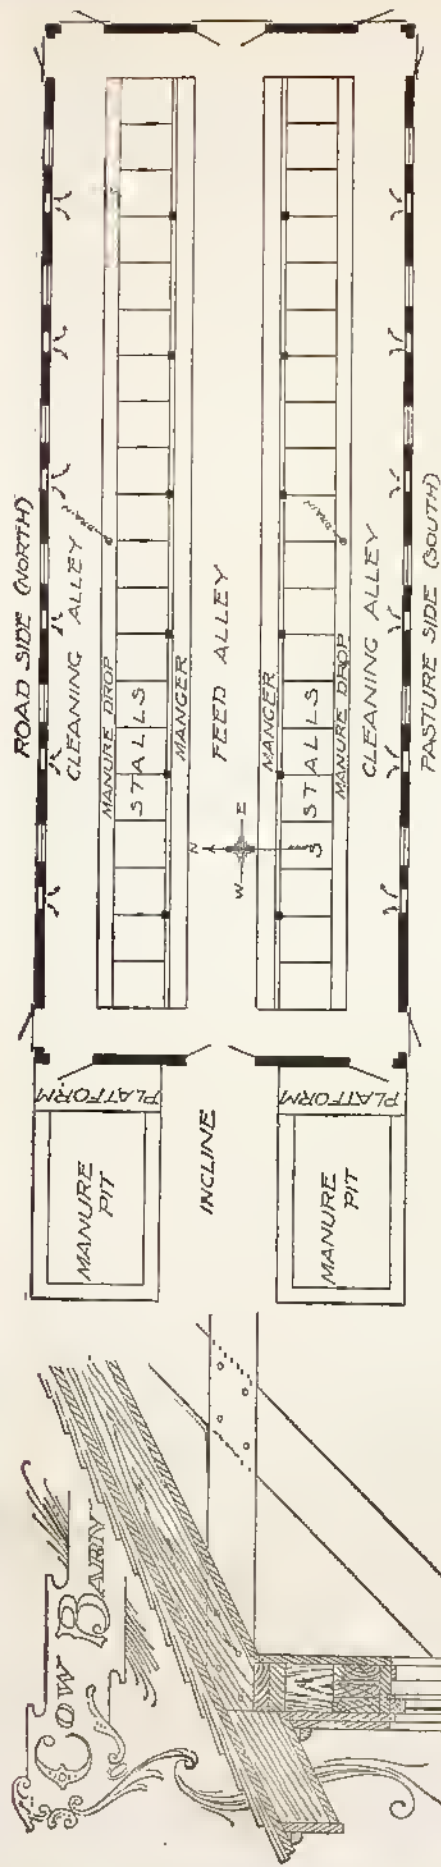

Design A-181—Gothic Barn

We illustrate here a small barn of Gothic design. The interior arrangement is particularly good. The stalls are right for convenience both in handling the horses and for cleaning the stable. The carriage room is quite large and convenient, with two storerooms, one for general garden tools with a small work bench on one side of it. The other storeroom is intended for harness. There is also a case which comes in very handy to keep the smaller things and those that are valuable. Provision is made on the second floor for a man's room, which may not always be necessary but at times will prove to be very valuable. The remainder of the space on the second floor is devoted to the storage of feed and the grain bins.

Design A-158—Cow Barn

See opposite page for cross-sections and sections showing framing of long and short posts.

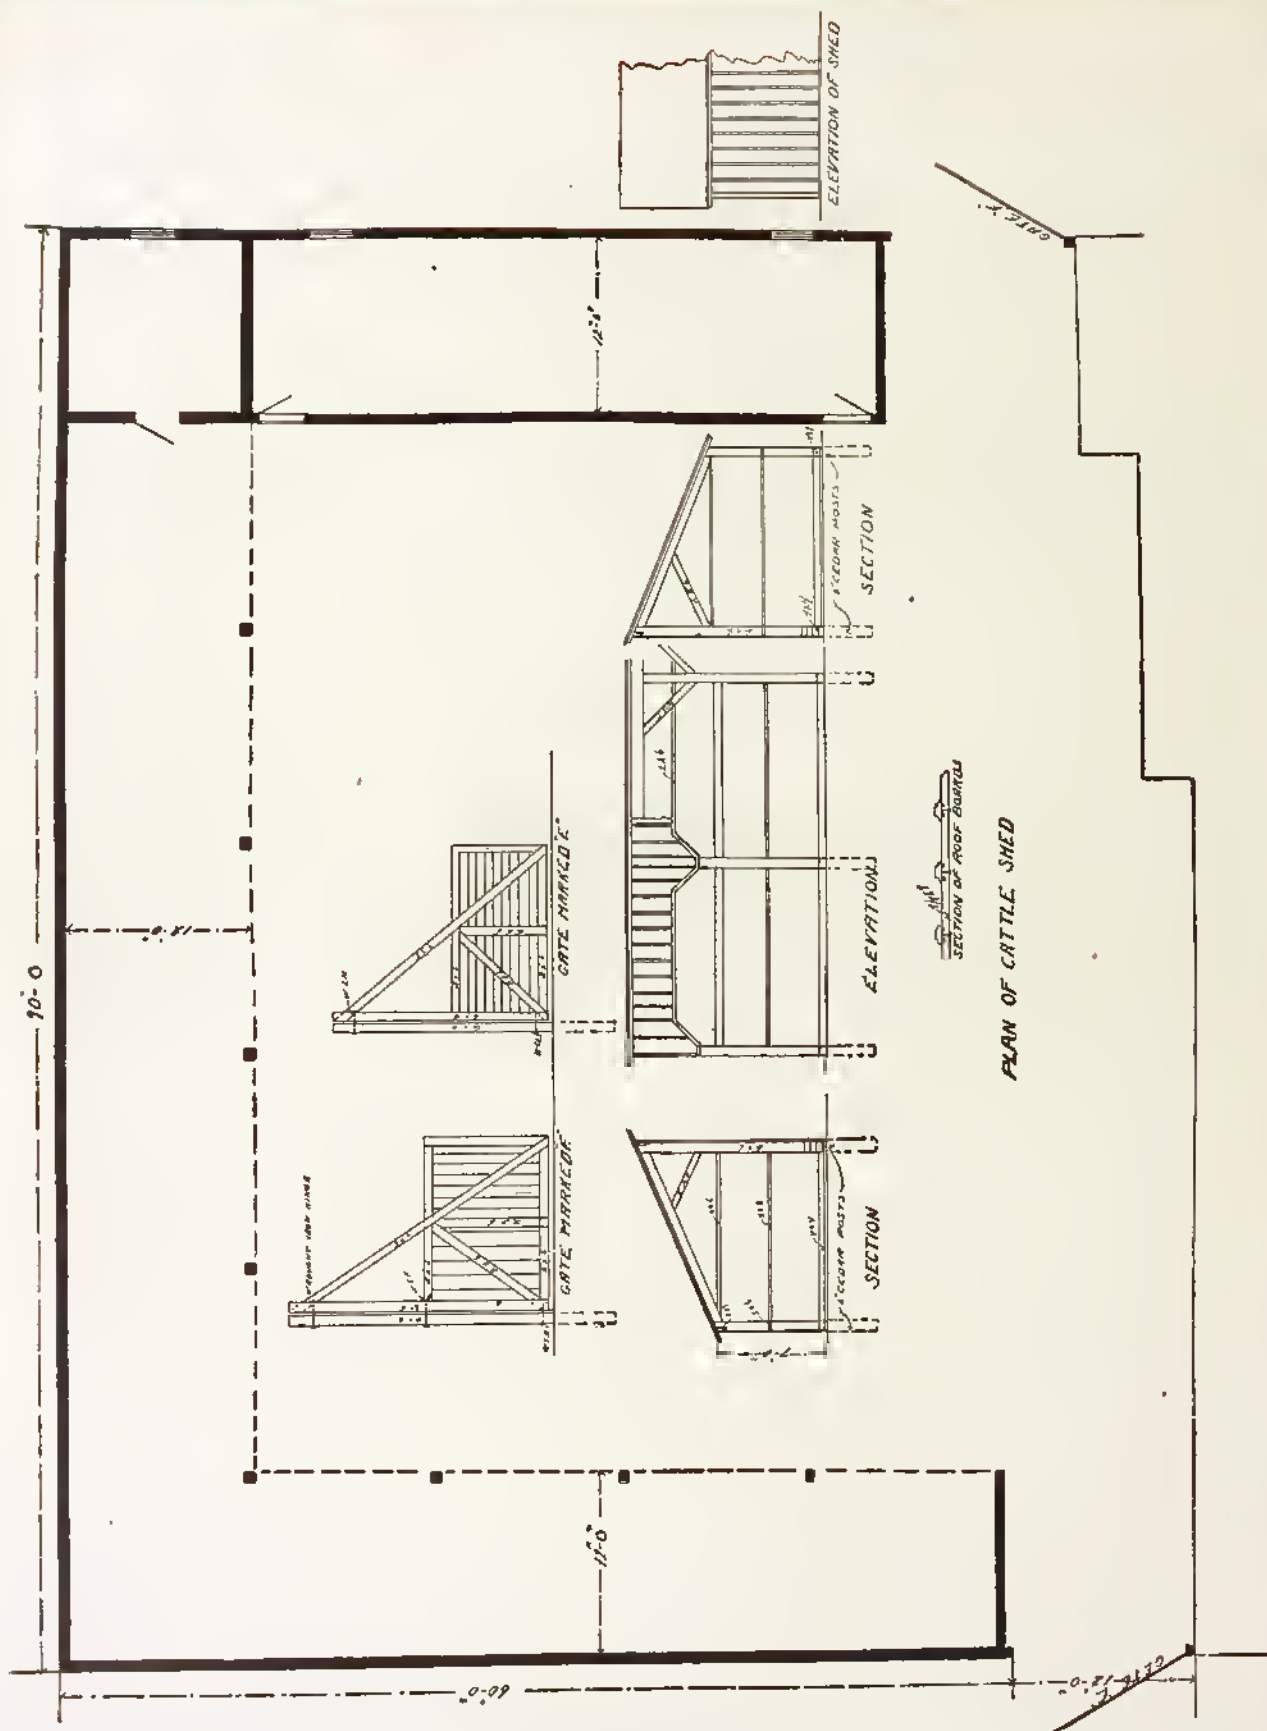

FLOOR PLAN

EXTERIOR DIMENSIONS
LENGTH 89 FT. WIDTH 32 FT.

PERSPECTIVE VIEW

Design A-159—Cow Barn

Design A-155—Cattle Shed

Extending along three sides of a hollow square is an old-style way of building feeding sheds. It is probably the best way now except that it is more difficult to economize labor with this construction than it is with a straight-away proposition where you can run a railway and a feed truck the whole length of the shed. The hollow square proposition has the advantage of warmth because it is protected from the east, north and west winds. These yards are always built opening to the south. In this plan there are convenient gates to drive in when bringing roughage or other feed to the cattle. The plans in detail show the construction.

Design A-116—Village Stable

We illustrate here an attractive stable for either city or village. The elevation is very pleasing; and while not exactly plain, the expense of building a roof like this or in the little projection over the upper front door is not very great. There is storage room above for hay, straw and oats, and the upper door is wide enough and high enough to admit the supply easily. The doors to the box stalls should be made in halves so that the upper half may be opened and the lower half closed.

DESIGN FOR A SMALL BARN

SCALE 1 2 4 6 8 10 FEET

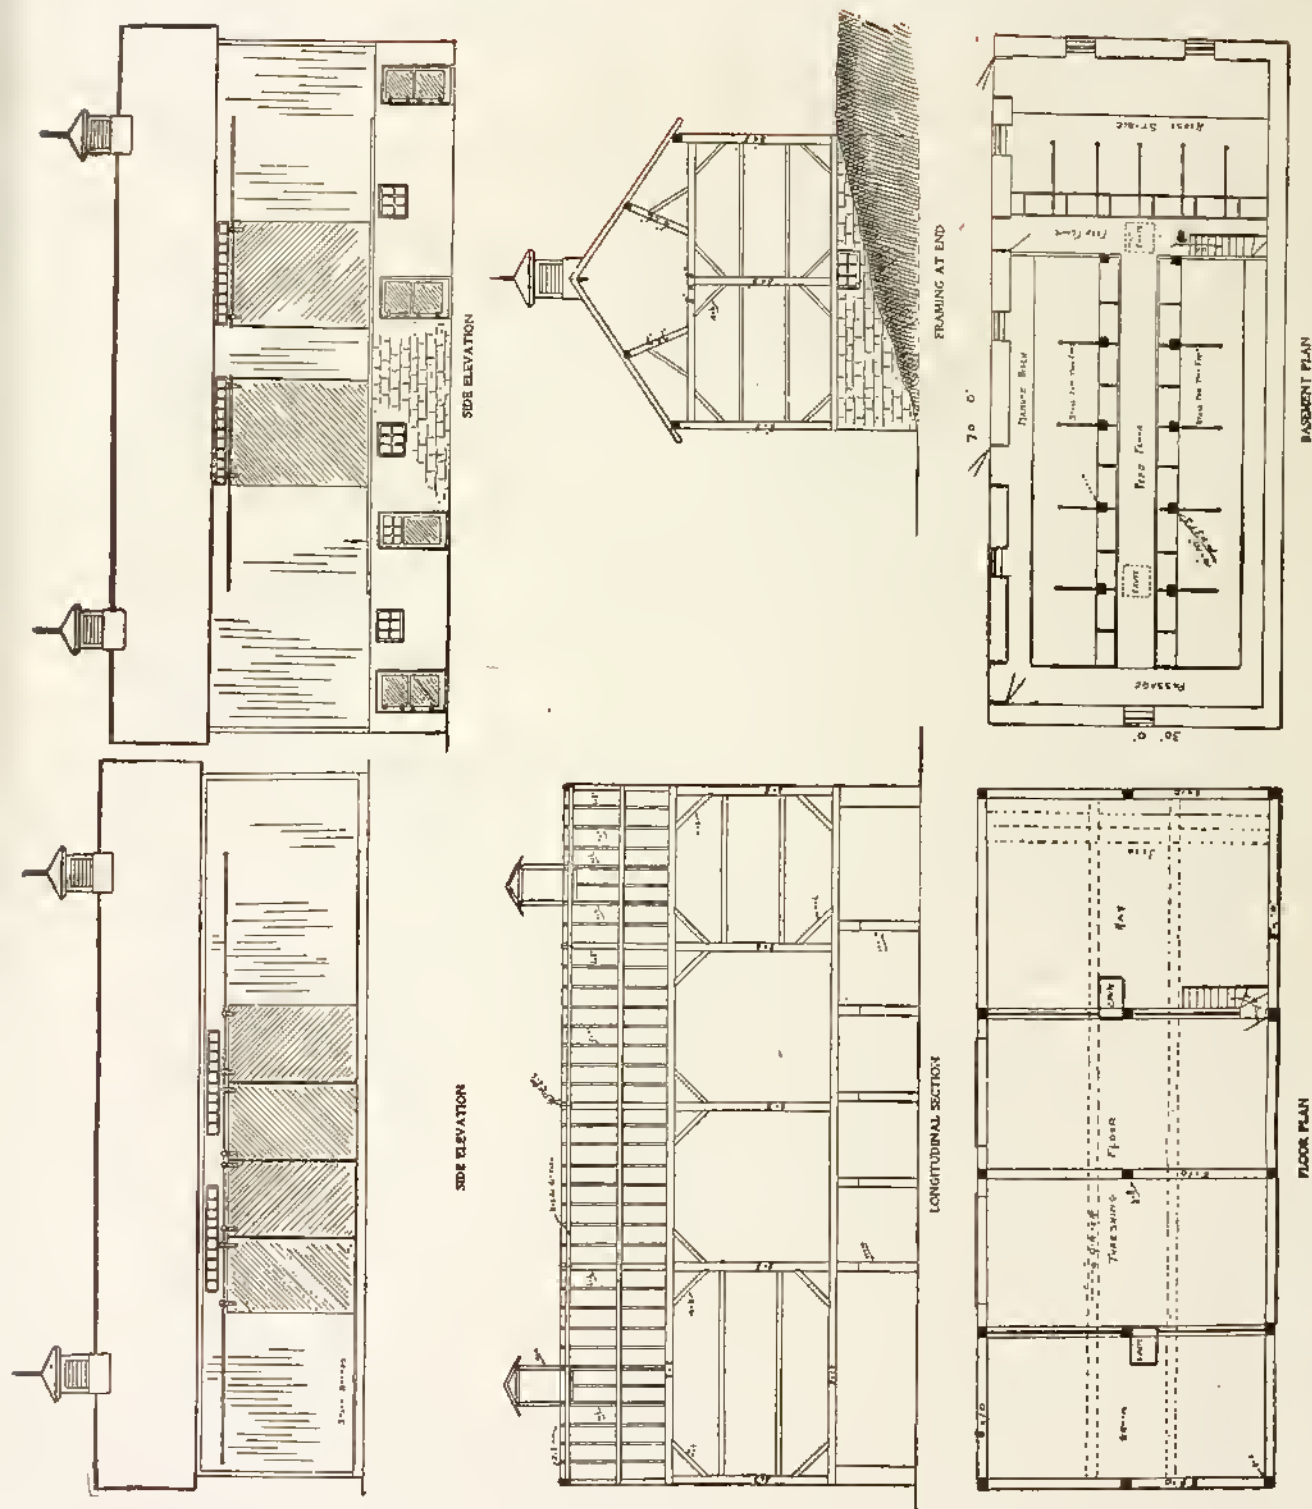

Design A-99—English Carriage House

This barn is of English architecture, built of frame on a stone foundation, and will accommodate three horses and three vehicles. The outside dimensions are twenty-eight feet by forty-three feet. The exterior walls are of two-inch by four-inch studding covered with one-inch by ten-inch rough boards lapped and stained brown. Roof is covered with moss-green shingles and tile ridges. Carriage room floor is of cement, and stable floor of one and three-quarter-inch matched pine.

Design A-162—Cow Barn

The above illustrations are the several elevations and the perspective of a barn for dairy cows. An important feature is the silo, which is shown in connection with the barn, and the place where it should be located. This barn is 81 feet long and 40 feet wide and can house twenty-four cows. The feed alleys are along the outside wall, while the manure troughs are along the middle driveway. This arrangement makes it easier to clean out the stable.

Design A-230—Barn

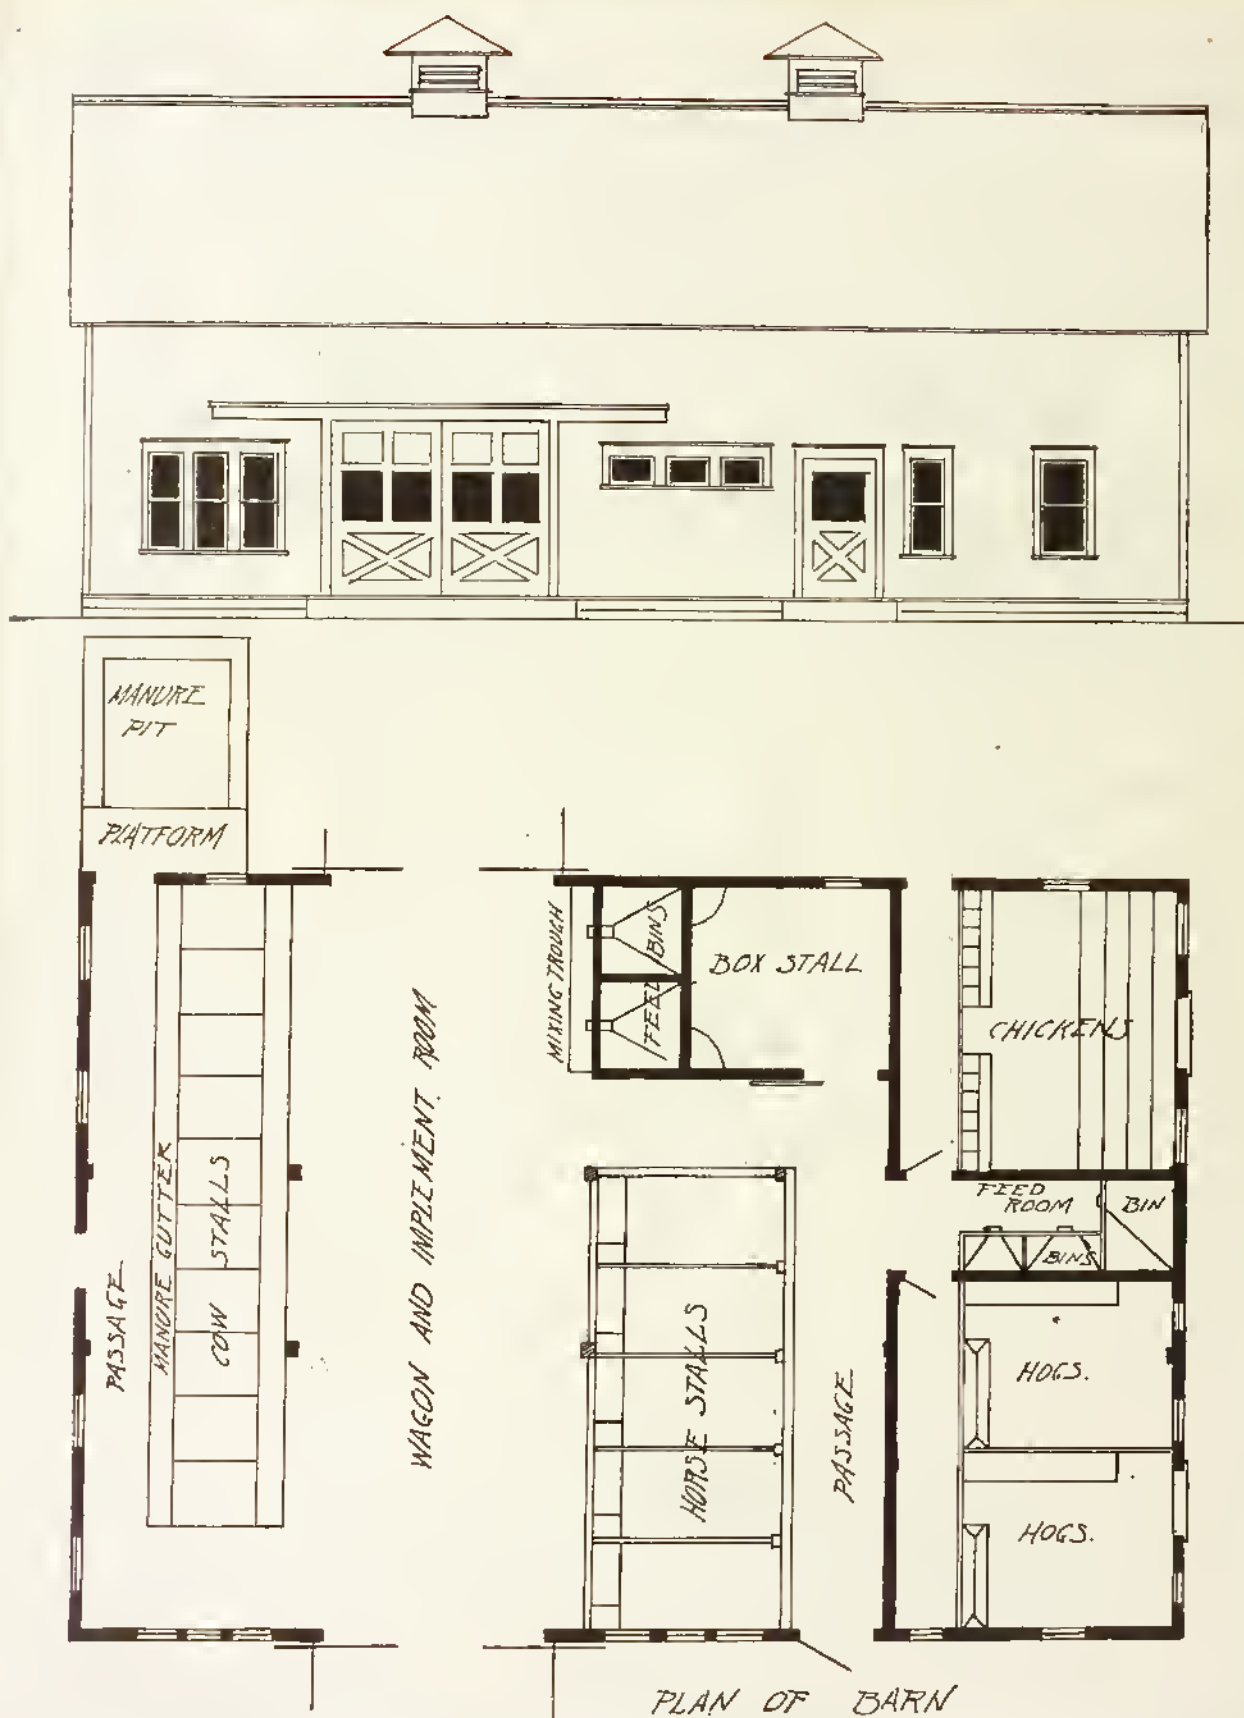

The above illustrations are of a bank barn 30 feet by 70 feet with basement walls of stone and the superstructure of heavy framework, as will be seen from the cross-sections. In the basement provision is made for the accommodation of six head of horses and twenty head of cattle, placing two of the latter in each stall. A feed floor or aisle in front of each set of stalls permits of easy access to all parts. The upper floors are left for the storing of grain, hay and farm implements.

FLOOR PLAN.

Design A-129—Separate Horse Barn

The illustration shows a small, convenient horse barn, twenty-one by thirty-two feet in size, with considerable mow room. A barn of this kind is very convenient on some farms where for good reasons it is found best to keep horses by themselves. A horse stable after this order will be found very convenient on any farm whether other buildings are calculated for horse stabling or not.

Design A-160—Medium-Sized Barn

The above illustration is a practical barn for a small farm where general farming is done. This barn will accommodate ten cows, five horses and about fifty fowls. It also has a large hog room, which can be used for sheep or calves if hogs are not desired. On the second floor there is ample room for the storage of hay, feed, hedding, grain and light vehicles.

FRONT ELEVATION.

FLOOR PLAN.

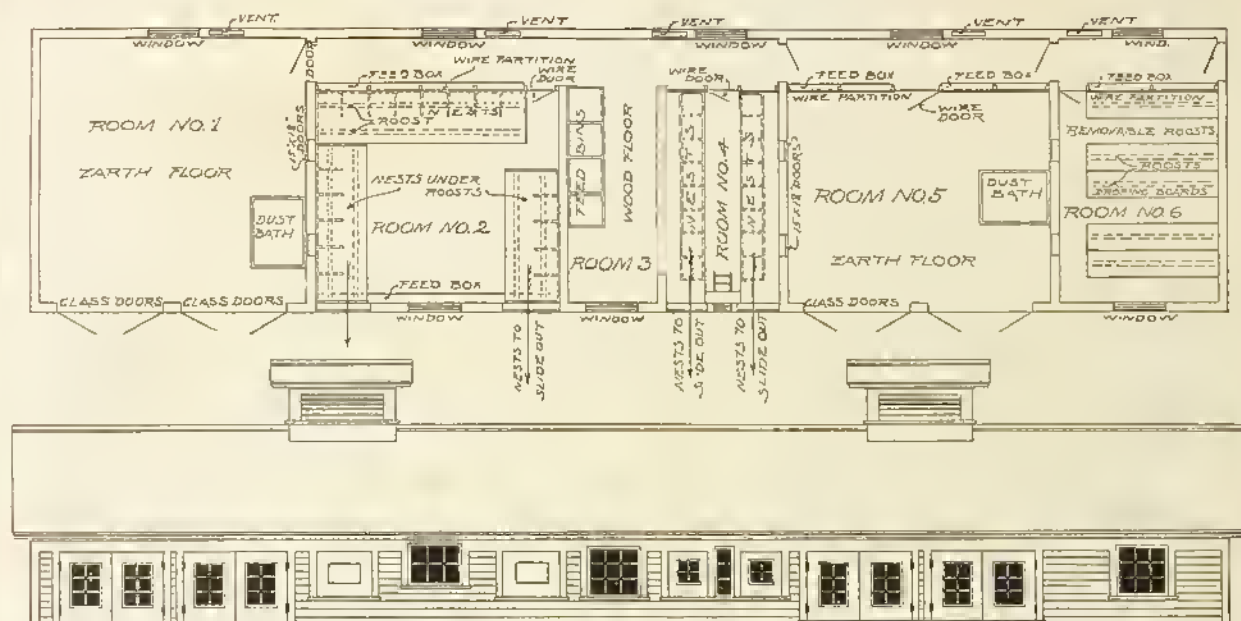

Design A-128—Corn House and Granary

A cheap building to hold corn and grain is shown in this illustration. The height is only ten feet, but that is high enough to shovel corn. There will be considerable side pressure on the wheat bin. A little precaution by way of extra ties in building is necessary on this account, but no heavy timbers are needed.

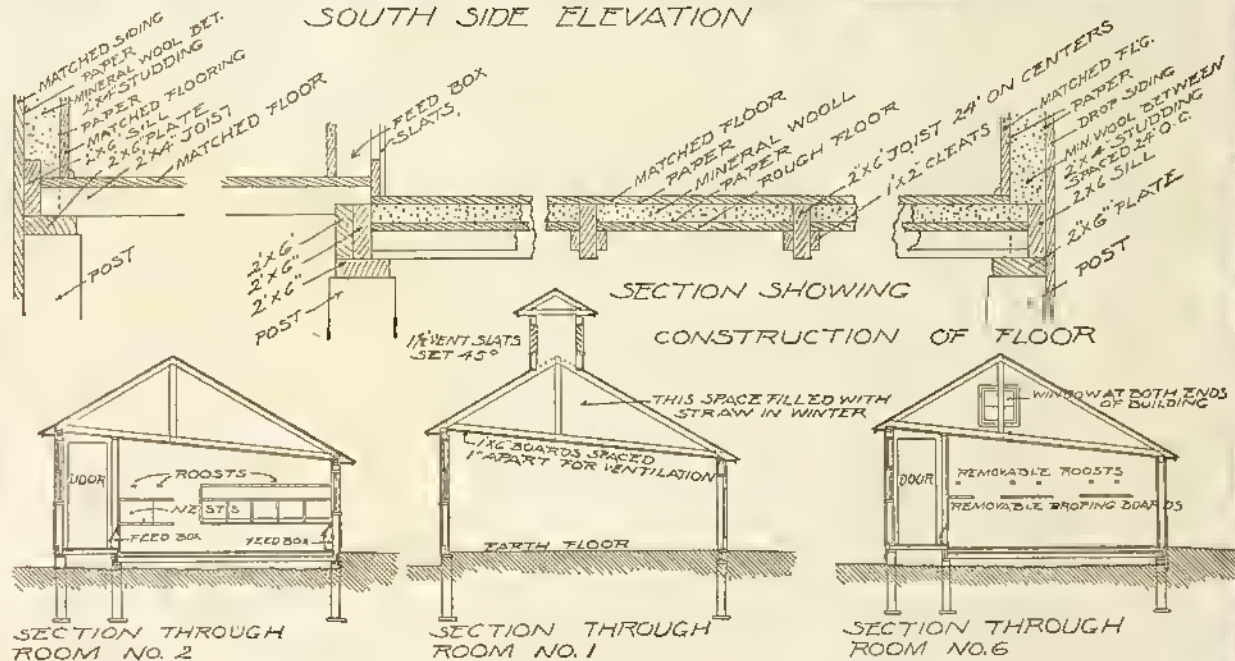

Design A-165—Chicken House

The poultry house illustrated above is designed to provide comfort for the fowls and to be profitable to the owner. It has an elevation of about fourteen inches above the ground, preventing the rats from nesting under the floor, and gives a free circulation of air under the building, keeping the floor perfectly dry and fresh. During winter months planks are set against the posts, closing up the openings; and by packing straw or manure against these planks, it makes a very warm building during the winter. The building should be built on the north side of the chicken yard so as to form a shelter against the cold winds.

CROSS SECTION

Design A-98—Duck House

The above illustrations are for a Duck House which is constructed upon a cedar post foundation. These posts are eight inches in diameter and rest on a two by twelve by twelve footing. The duck house is 30 feet long, 15 1/2 feet wide and nearly 12 feet high. The construction of the floor is as follows: First the rough flooring which is covered with heavy paper; on top of this is a two-inch layer of mineral wool, which is again covered with heavy paper; and then the upper flooring is put on. The walls are constructed in like manner with the exception of having drop-siding, thus making it easier to clean them.

Baptist Church with seating capacity of 200

Floor Plan

316

PRICE

of Blue Prints, together
with a complete set of
typewritten specifications,

ONLY

\$40.00

We mail Plans and Speci-
fications promptly.

Blue Prints consist of
floor plan; front, rear, two
side elevations; wall sec-
tions and all necessary de-
tails. Specifications are
typewritten and contain all
the information necessary
for the proper construction
of the building.

SPECIAL PLANS AFTER YOUR OWN SKETCHES

AT POPULAR PRICES

If you prefer to have a home constructed after your own ideas of arrangement, we would like very much to help you in developing your plans, or assist you in any way to solve the problem of a plan for your new home.

There are scores of people who spend years in planning and designing the home they wish to build, and, in many cases, never cease regretting that it does not come up to their requirements. "Home made" plans are inaccurate and cause endless worry, waste of materials and extra expense. With our long experience and with the equipment and the facilities we have for handling work of this kind, we can relieve you of the trouble and anxiety of planning your own home, save you time and money and furnish you with plans that we know will be entirely satisfactory. All we ask is an opportunity to demonstrate our ability to please you.

CORNER OF DRAFTING ROOM.

Our work is by no means confined to the designing and planning of houses, for, in addition to this class of work, we make a specialty of such work as:

Schoolhouses, Office Buildings, Bank Buildings, Factories, Town and Lodge Halls, Churches, Hotels, Public Libraries, Stores, Farm and Outbuildings and All Kinds of Public Buildings.

Our Special Department is the finest of its kind in the country, being under the personal supervision of Licensed Architects, who have experience in handling all kinds of work, and they have the assistance of a corps of competent draftsmen.

Our location, equipment, and facilities for handling work of all kinds cannot be excelled. Every plan we design or develop is guaranteed to be complete and accurate in every respect. We can get plans out in the quickest time possible and at a price that cannot help but interest you.

Our experience being of such long duration and our work extending over such a large territory, enables us to give you the most satisfactory results in every instance.

Our aim is to please you. Our whole organization is at your service. Consult us before purchasing your plan. We can save you money.
